

INVISO SERIES - Trimless (plaster over) CFL recessed downlights

TS DE941C WU

TS DE942C WU

The **Vision-lite INVISO Series** provides the interior designers and architects with the ultimate trimless downlight. The installation frame of the fixture is pre-installed, then plastered over and the ceiling and installation frame painted over. The luminaire body is then installed into the installation housing to provide a seamless installation to maximize the 'hole in the ceiling' effect.

Fixture frame can be adjusted to cater for different thickness of the ceiling box. Re-lamping or servicing can be done without removing the installation frame so the ceiling will not be damaged.

Top anodized aluminum reflector ensure a high optical efficiency while the frosted acrylic diffuser provides for efficient light transmission while concealing the lamp from view.

Ordering Code:

| Model Number | Lamp | Ballast option |
|--------------------|-------------|--|
| TS DE941C WU - 113 | 1 x TCD 13W | |
| TS DE941C WU - 213 | 2 x TCD 13W | |
| TS DE941C WU - 118 | 1 x TCD 18W | Suffix - CG for conventional ballasts |
