

TC-TEL 32W×1 GX24q-3

Frame: Die-cast aluminium · Off-white (matt finish)  
 Reflector: Engineering plastic (anodised aluminium)  
 Cone: Engineering plastic (silver plated)  
 Weight: 1.1 kg  
 Built-in electronic control gear

New TC-TEL dedicated reflectors:  
 born of the relentless pursuit of  
 efficiency through  
 light distribution control

By incorporating a reflective curve for each lamp tube, ENDO has achieved the ideal light distribution for TC-TEL fluorescent lamps, a type of lamp whose light is considered particularly difficult to control. Efficient light beam control increases light distribution directly underneath the lamp by 15%. (Patented)

**Normal reflector**  
 Light from the TC-TEL lamps is difficult to control and scatters.

**New TC-TEL dedicated reflector**  
 Light is controlled and efficiently concentrated directly underneath the lamp by ENDO's newly developed dedicated reflector.
